Grade Level: 4 and up

Customer Reviews

My six-year old loves this book. We have read it together several times and each time he points out something new that we can discuss or research on the internet, so we are always learning from this book. The story is wonderful, fresh take on the 'circle of life' and the illustrations are great too. Not a book I could find at our local library well worth the purchase.

As a third grade teacher I must say that this book is an excellent addition to a classroom. It works perfectly with the themes of the African Savannah and interdependence! A MUST HAVE.

Very happy with this book. My daughter is almost 7 and she is beginning reader, she love trying to read it. Also she enjoy looking at the pictures. It is very educational book. I love non fiction books for kids. These type of books fill up the child curiosity and create new one so it let the child to ask for more knowledge and books.

Wonderful book! My daughter loved it, it came early and in excellent condition! A wonderful story she will use in her kindergarten classroom.

We ordered these to use for third grade science instruction. Books came brand new. Illustrations are beautiful. Highly recommend this title.

This book is amazing - my sister lived in Africa for 7 years and I visited her during that time. One of the things that she pointed out to my grandson and me was the baobab tree and it's amazing staying power. I sent her a copy of this book and she learned things about the tree that she never knew! Loved it!
