Basher Basics: Weather: Whipping Up A Storm!

Synopsis

Basher Basics: Weather, Whipping up a storm! created and illustrated by Simon Basher, written by Dan Green: Welcome to the wild world of weather, Basher style! Meet Hurricane, a violent blusterer; Atmosphere, a many-layered character who keeps the planet cozy; hard-nut Hail and sneezy Sleet; Drought, the dusty fellow who makes life hard for animals, plants and people; and mischievous El Niño, who messes around with ocean currents to chaotic effect. Includes plenty of detail on the forces that make weather work • this approach is so effective, readers will forever think about these characters every time they hear a weather report or step outside.

Age Range: 8 - 12 years

Grade Level: 3 - 7

Customer Reviews

I LOVE THESE BOOKS!!! HOWEVER! The book advertised here, (to include poster, as stated on the cover, bottom right corner), WAS NOT INCLUDED!!! Nor did my book, received, have that same cover saying a poster is included. My 7 years old REALLY LOVES THESE BOOKS!!! He enjoys the illustrations as much as all the factual information. It is a wonderful addition to our books on science as I home school! I would highly recommend this book!! But if you want the poster, 2 out of the 4 books, which stated poster was included, did NOT include. resent me the books but I received the exact same thing :(Very disappointed.

My kids have really enjoyed learning about weather with this book. The way the book personifies weather somehow makes it stick for them a little more. I was concerned about the lack of real weather pictures, but the drawings seem to capture their attention and help them remember the information later. The book also came with a weather poster that my kids really like. They talk about it everyday. This is a great book for introducing weather to kids. (Mine are 6, 5, and 3.) They'll learn lots of new weather related vocabulary words.

This book is great to teach kids about weather but we have many Basher books and this one is about 1/2 or even 1/3 the thickness of some of them. I wish I had noticed the "Basher Basics" at the top or known this was a lot shorter than the other Basher Books. I would stay away from the basics ones unless you are ordering them for younger children. Wish I had skipped this one since mine are 9 and 13 and this is a bit too basic as compared to the chemistry, physics ones etc.

Very cool book. We love all the Basher Books and use them for homeschooling. Unfortunately, after finding one brand new at a bargain store for only \$1.99, it's hard for me to pay \$8 or \$9 here. I just keep watching the prices for good sales.

Love this book!!! This one and the Human Body one are by far my son's favorite Basher books. They give just enough information to not go over a young child's head while still giving lots of education goodies. I love the way this series of books adds humor to the information to keep the kids interested in what might otherwise be pretty boring information.

We have purchased many books from this series for my grandson's homeschooling classroom. He absolutely loves them. Written in "kid speak" so easy to digest information but dives into every aspect of the subject. Just love them.

This is a great series to introduce kids to the sciences in simple language. Heck even adults can benefit from the series. Includes great pictures and rhymes for you to quickly pick up key points - this should be a must have in school curriculum. Ideal for home schooling too.

Good bedtime reading books. My son loves this for me to read and explain at bedtime. 1 chapter a nite rule. :)
